

Michele Hertlein Global Outreach Program

"Thank you for your generous donations to our Foundation. We are thrilled to have your support. Through your donations, we have been able to deliver medications to children who suffer a diagnosis of cancer in Honduras and continue working towards saving more children's lives. You truly make the difference for us, and we are extremely grateful!"

Nubia Zuniga,
*President of Fundación Hondureña Para
El Niño Con Cáncer
Honduras*

It is estimated that **400,000 children and adolescents around the world are diagnosed with cancer every year.** For children with cancer living in higher income countries, the prognosis is bright – 85% or more will survive. Unfortunately, the inverse is true for cancer-stricken children living in poorer countries. Eighty percent of children diagnosed with cancer living in low- and middle-income countries will die from their disease due to the lack of basic tools to diagnose and treat their cancer.

How We Help The National Children's Cancer Society (NCCS) **Michele Hertlein Global Outreach Program** addresses the inadequate or nonexistent medical care for children with cancer around the globe, with absolutely no cost to the family.

Our global program **partners with the best branded and generic pharmaceutical companies in the U.S. to obtain drugs and medical supplies for distribution** to children's hospitals and supported clinics in low- and middle-income countries.

Since 1993, the program has distributed over **\$466 million in donated medical products to 105 facilities in 53 countries.** Medical professionals at our partnered facilities **estimate that more than 196,000 children** have been assisted through the program's donations.

Where We Make a Difference...
